Career Objective

Dedicated Software QA Tester with experience in software testing, system validation, defect reporting, and business requirements analysis. Seeking a Quality Assurance Tester position where I can utilize my skills in manual testing, regression testing, API testing, Jira defect management, and test case execution to contribute to the delivery of high-quality software products.

Core Skills & Knowledge

- Knowledgeable in Manual Testing, Functional Testing, Regression Testing, and Integration Testing.
- Experienced in creating and executing Test Cases and Test Scenarios.
- Knowledgeable in defect tracking, bug reporting, and issue management using Jira.
- Experienced in API Testing using Postman.
- Knowledgeable in Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Knowledgeable in SQL for database validation and data verification.
- Experienced in testing Web Applications, Mobile Applications, and Desktop Applications.
- Experienced in Content Management System (CMS) testing and content publishing validation.
- Knowledgeable in gathering, reviewing, interpreting, and analyzing business requirements.
- Experienced in validating content workflows, UI behavior, and system functionality.
- Knowledgeable in GitLab code comparison and version validation activities.
- Knowledgeable in HTML5, PHP, VB.Net, C#, ASP.Net, Java, and ABAP.
- Knowledgeable in Microsoft Office Applications, particularly Excel for test documentation and reporting.
- Basic knowledge of Android Development using Xamarin and Android Studio.
- Knowledgeable in Adobe Creative Suite applications such as Photoshop and Premiere Pro.
- Knowledgeable in Computer Networking, PC Troubleshooting, and Printer Troubleshooting.
- Strong analytical, documentation, problem-solving, and communication skills.
- Fast learner, independent, reliable, trustworthy, and able to work effectively under pressure.
- Can type 40 words per minute (WPM) with high accuracy.

Professional Experience

SOFTWARE QA TESTER

Argold Jobs, Inc (Assigned to MQuest Ventures)
January 26, 2026 – June 30, 2026

- Develop and execute test cases and test scenarios based on business and functional requirements.
- Perform manual testing for web, mobile, and desktop applications.
- Conduct regression testing to verify that new enhancements do not affect existing system functionality.
- Identify, document, and track defects using Jira.
- Validate content publishing workflows, UI behavior, and system functionality prior to release.
- Collaborate with developers, business users, and stakeholders to validate fixes and ensure software quality.
- Perform user interface, functionality, and content validation prior to production deployment.
- Prepare testing documentation, defect reports, and test execution results
- Participate in Agile sprint activities and testing discussions.
- Conduct cross-browser and cross-device testing to ensure consistent user experience.
- Maintained and updated TV5 website content, including weekly program schedules and show listings.
- Verified the accuracy of program schedules, show information, images, and content displayed on TV5 Schedule and Shows pages.

Main Project: One CMS (Content Management System)

- Performed functional and regression testing for content creation, editing, scheduling, and publishing workflows.
- Validated user roles and permissions for different CMS access levels.
- Tested end-to-end content publishing from CMS to multiple platforms.
- Verified data accuracy and content consistency across systems.

Supported Platforms:

- One Sports – validated published articles and content display from CMS
- TrueFM – UI and content verification for static pages
- TV5 Promo Page (Kapatid Manood at Manalo) – form and UI validation
- TV5 Website – maintained and validated weekly program schedules, show listings, and published content.
